DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This segmentally arched stone structure carries the C & O Canal across Neck Road or Four Locks Road. The Aqueduct is constructed of uniformly cut stone blocks resembling ashlar. It is of the same type of masonry as was used for all canal structures. The stone aqueducts associated with the Canal do not resemble the stone arched bridges found elsewhere in the County, indicating that canal construction was distinct from local stone building.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This small single arched stone aqueduct reflects the engineering involved in building such structures as well as canal architecture. It dates from the second quarter of the 19th century.
